

A background image showing a person's hands working at a computer. One hand is holding a pen over a document, while the other is typing on a keyboard. The scene is brightly lit, suggesting an office environment.

WinEUR CONSOLIDATION

Automation of group bookkeeping

As part of holding accounts for multiple companies (group), **WinEUR CONSOLIDATION** provides results and analysis of consolidated figures. Consolidation aggregates the accounts of each of the companies in a group and operates restatements so it appears as a single entity. You can explain, audit and submit.

PRODUCT HIGHLIGHTS

- ✓ Processing of consolidated companies in multiple levels and multiple currencies
- ✓ Processing of consolidations with percentage of holdings
- ✓ Option to consolidate companies with different chart of accounts
- ✓ Consolidation of Ledger, AP/AR, Analytic and Securities
- ✓ Processing of INTERCO entries

Technical aspects

GENERAL ASPECTS

- WinEUR CONSOLIDATION automates accounting operations of a Group. A group is a company like any other, with its own reference currency and chart of accounts.
- A table indicates for each account of the group's chart of accounts its composition, or what accounts of groups or accounts for each subsidiary that needs to be included (formulas).
- The group don't need to have the same chart of accounts as its subsidiaries, nor the same reference currency.
- Ability to indicate for each company that is part of the group its percentage of participation (minor interest).
- Specific tools allow for booking within the group's accounts as accounting entries:
 - Opening balance sheet: for each account of the group's balance sheet, an entry is automatically generated with one line per subsidiary.
 - Movement for each period. For each of the group's accounts, an entry is automatically generated with one line per subsidiary to record cumulated movements over a period. Choice of the period is free (usually monthly).
- Since a Group is like any other company, it is possible to use all the features provided by WinEUR ACCOUNTING:
 - Editions and reports
 - Reevaluation of foreign currencies which is essential when consolidating accounts in currencies different to that of the reference currency, or that the Group currency is not the same as that of its subsidiaries
 - Interest on current accounts
 - Entries (audit-trail of all adjustments and eliminations)
 - Consolidation: this enables consolidation on as many levels as necessary.
- WinEUR CONSOLIDATION enhances reporting functions by adding a "Company" dimension with an extra "Consolidation" tab where the user can select the companies to be analysed (consolidated reports).
- Column reports (accounts, analytic accounts, AP/AR, invoices, journal, ledger): a type of column allows for the identification of the company from which you can discover the origin of an item or calculate a subtotal per company.
- Liner reports (Balance sheet and Profit & losses)
- «Fixed page» reports that allows you to produce on the same document synthetic information of different companies

List of companies to consolidate

Code	Currency	Company name	Fiscal year date	Participation	Consolidation account
SOC1	GBP	Titres Conso Tiers COMPANY 1	06/06/04 - 31/12/05	100.00 %	900000
